

Eco Chic Product

It's the Static Eliminator Re-usable dryer sheet. The weave of the dryer sheet gives static fighting power instead of coating your clothing with chemicals—these unique re-usable dryer sheets conduct the static of your laundry. The re-usable dryer sheets are safe for sensitive skin, allergy and eczema sufferers and can be used hundreds of times.

- Chemical Free
- 100% Hypoallergenic
- Safe for Infants
- Eliminates Static
- Softens Fabric

Safe and cost effective—this is my kind of product! I've been using my re-usable sheets for two months and they really work. Find them on line at www.staticeliminator.ca

A GREEN ENERGY ALTERNATIVE-SPACE-BASED SOLAR POWER

Space-Based Solar Power (SBSP) has the potential to solve our energy and greenhouse emissions problems. SBSP can provide large quantities of energy with little environmental impact. SBSP is a concept that has been studied since 1968. Some companies plan to have solar space stations in the atmosphere by 2020. Solar panels located in space would collect the sun's energy and transmit them back to Earth via

wireless transmission by microwave or laser radiation. There are so many advantages to developing SBSP. Unlike terrestrial solar and wind power plants, space-based solar power is available 24 hours a day, seven days a week in enormous quantities. Cloud cover, day light or wind speed does not affect it. Unlike oil, gas, ethanol, and coal plants, SBSP does not emit greenhouse gases. And, unlike, nuclear power

plants SBSP will not produce hazardous waste which needs to be stored and guarded for hundreds of years. With so many advantages the race is on to get solar panels into space. The solar energy available in space is literally billions of times greater than what we use today. The lifetime of the sun is an estimated 4-5 billion years, making space-based solar power a truly long-term energy solution.

RENATURE PACKING PEANUTS

Instead of sending the by-products from potato and corn processing to a landfill, they are being reclaimed and made into packing peanuts. These off-white peanuts are 100% biodegradable and water-soluble and, best of all, they won't pollute groundwater. To dispose of renature packing peanuts you can add them to your compost bin, put them in the garbage disposal, flush them down a toilet or drain, or reuse them for your own shipping needs.

Frontgate Recycling Bin Cart

Looking for a simple way to transport your recycling bins to the curb? Frontgate sells a great mobile recycling cart for your 18 gallon blue bins. The smart design saves space and easily wheels bins to the curbside. To find out more go to www.frontgate.com or call 1-800-626-6488.
