

Summer Events

For your summer parties and events, we have portable restrooms, portable hand wash units, special event cans as well as our garbage and recycling.

Why Recycling Matters

Recycling conserves resources, helps protect the environment, saves energy and reduces space at the landfills. If you don't already recycle find out how you can do your part in protecting the environment. Contact Clear Creek Disposal to order your recycling bins. It's easy and we'll help. Call 208-726-9600 for more information or visit www.ccdisposal.com

Reminders

Please Do Not Put Hot Ash in dumpsters or auto carts.

Top Tips for Recycling in the Garden

- Tons of garden waste, grass, branches and leaves are sent to landfills each year. They are a valuable source of nutrients that can be turned into something more useful: compost. The compost can then be added to your perennial beds, shrubs and tree wells.
- Use your old egg cartons to start your seeds indoors. When ready to transplant the seedlings simply cut apart the egg crates and plant directly into the soil. The egg carton will easily decompose in your garden. Thus there is less risk of damaging your tender seedlings.
- Take your empty plastic nursery pots back to garden centers—they will reuse the pots or send back to the growers for them to reuse.

Can it be Recycled?

Can I recycle car batteries? Yes you can. Currently NAPA Auto Parts in Bellevue takes old car batteries. Just drop them off at NAPA Auto Parts 218 N Main Street, Bellevue. Call for Hours at 208-788-5721.

Can I Recycle cell phones? Yes you can. There are several different ways to

recycle those old cell phones. The easiest and closet location is at the ERC in Ketchum. They have a drop off box located in their front foyer that is open 24 hours a day. They accept old cell phones and batteries. They do not take old cell phone chargers. Their address is 471 N. Washington Avenue in Ketchum.

GREEN ECO-CHIC PRODUCTS: DOG BEDS!

I had a fun time last week at ThunderPaws Pet Shoppe. I stopped in to buy a dog bed and was overwhelmed by all the green dog products now being manufactured. I bought a "green echo-chic" dog bed. Not only was it cool looking but it was made of organic cotton and filled with super-soft intelliloft fiber, made from 100% recycled soda pop bottles. The best part is they are made in America. The company is called West Paw Design. To learn more about this product you can go online to www.westpawdesign.com or call ThunderPaws Pet Shoppe at 208-726-PETS or 208-726-7387.

Top Tips on Reducing Excess Packaging

When dining out bring your own To Go bag. Choose a cute bag that will coordinate with your outfit. Fill it with a few empty plastic or glass containers. If you have some leftovers ask your service to use your containers. You will be saving excess plastic To Go containers from entering landfills, plus you will look so chic with your own To Go Bag. Start a trend!
